

JAI NANDAN

DATA SCIENCE & MACHINE LEARNING

PROFESSIONAL SUMMARY

Data Science and Machine Learning enthusiast with hands-on experience in Python, Data Analysis, NLP, and predictive modeling. Skilled in data preprocessing, EDA, feature engineering, model evaluation, and data visualization through applied internships and end-to-end projects.

EDUCATION

- Bachelor of Technology in Computer Science and Engineering** 2023 – 2027
Sardar Beant Singh State University, Gurdaspur
- 12th Standard (Non-Medical)** 2023
Shahid Major Kulbir Singh Rana Govt. Senior Secondary School, Tangosha (Pathankot)
- 10th Standard** 2021
Anand Modern Senior Secondary School, Gurdaspur

PERSONAL PROJECTS

- Customer Churn Prediction & Business Analytics** Feb 2026 – Apr 2026
 - Built a machine learning solution to predict customer churn and identify high-risk customers using data preprocessing, EDA and feature engineering.
 - Developed an interactive Streamlit dashboard for churn probability and business insights.
- Flight Delay Prediction** Aug 2026 – Present
 - Processed and analyzed 5.8M+ flight records using Python and Pandas to predict flight delays.
 - Applied feature engineering and Cross-Validation / K-Fold Cross-Validation for reliable model assessment.
- Credit Card Fraud Detection** Jun 2026 – Aug 2026
 - Built a machine learning system to detect fraudulent transactions, including preprocessing, feature analysis and model training.
 - Developed an interactive Streamlit interface for fraud prediction.
- Fake News Detection** Jun 2025 – Aug 2025
 - Developed an NLP-based model using TF-IDF and Passive Aggressive Classifier to classify news as real or fake.
 - Achieved approximately 95% classification accuracy during model evaluation.
- Attendance System**
 - Developed an automated attendance management system using Python, OpenCV and face recognition.
 - Implemented real-time attendance tracking and record management, reducing manual work.

SKILLS

Programming	Python	SQL		
Data Science & ML	Pandas	NumPy	Scikit-learn	EDA
	Data Preprocessing		Feature Engineering	
Visualization	Matplotlib	Seaborn	Power BI	Excel
Development	Streamlit	HTML	CSS	JavaScript
Tools & Database	Git	GitHub	Jupyter Notebook	MySQL

CERTIFICATIONS

- Python Libraries for Data Science — Simplilearn 2026
- A Mega Python Course – 15 Weeks with Python — Udemy 2026
- Excel from Beginner to Advanced — Udemy 2025
- AI Workshop — Be10x 2024

WORK EXPERIENCE

- Data Science & AI Intern** Jun 2026 – Aug 2026
Indian Institute of Technology Jammu, Jammu
 - Built a Flight Delay Prediction model using Python, Pandas and machine learning techniques.
 - Performed data cleaning, preprocessing and EDA on flight datasets.
 - Applied Cross-Validation and K-Fold Cross-Validation for model evaluation.
- Python with AI Intern** Jun 2025 – Aug 2026
Solitaire Infosys, Mohali
 - Developed a Fake News Detection system using TF-IDF vectorization and Passive Aggressive Classifier.
 - Performed text preprocessing and model evaluation.
 - Gained practical experience in Python, NLP and machine learning.
- AI/ML Intern** Feb 2026 – May 2026
Persevox, Remote
 - Performed data preprocessing, exploratory data analysis and feature preparation.
 - Applied Python-based data analysis and visualization techniques.
 - Worked on project-based machine learning assignments.
- Data Science Intern** 2-Month Internship
Mentor: Manav Sharma
 - Worked on data cleaning and preprocessing for House Price Prediction.
 - Practiced Python, data analysis and the machine learning workflow.
 - Refined existing machine learning models and worked on model interfaces.
